

Ancestry in Action WORKSHOP SERIES: DNA Solutions to Common Genealogical Problems

DNA is the essence of family trees and can help you determine if you are related to other people. These workshops will show you how genealogists have made use of DNA in their research.

10 a.m. - 4 p.m. Saturday, November 15, 2014
Central Library | Tandy Lecture Hall

With special guests...

DNA Testing for Genealogical Purposes

Michael Bassett

Learn how DNA testing can be used to help family researchers overcome genealogical brick walls, make ancestral connections and provide useful information on biological and geographical heritage. Bassett discusses Y, mt and autosomal DNA, providing real-world examples.

and

Evaluation of DNA Test Results to Support Genealogical Research

Randy Whited

Just as with any other source of genealogical records, DNA tests require an understanding of how the information was created and how to correctly interpret the evidence. Whited presents case studies highlighting how the three primary DNA tests (Y, mt and autosomal) are used to enhance genealogical research and discover relationships.

*Reservations required. Call 817-392-7740 or email genlhst@fortworthtexas.gov to reserve your seat.
Light refreshments provided.
